

The high school Oehmichen in Châlons en Champagne, is an educational center open to the outside. Thanks to its technological platform, we are already collaborate with several partners such as Erasmus and Mexprotec (Mexico) for wich we receive some trainees during the school year.

Our technological formation, untill BTS (BAC+2) in industrial maintenance, engineering and also logistics, can provide quality projects.

These latter, are implementing in their globality , from the elaboration of their specification their production. The students take part in an project, while being closest to the professional world.

With our establishment close to the local companies, this project seek out high schools and companies of our european paterns.
